

TECHNICAL DATA SHEET

BUBBLICIOUS

PREMIUM CARNAUBA SHAMPOO

FEATURES

- Only 30ml needed per wash.
- Produces a thick foam.
- Adds slickness to your wash mitt.
- Leaves a layer of protection on your paint.

DESCRIPTION

Here at Auto Glanz we are firm believers that carrying out a well-drilled safe wash is the key to maintaining a show winning finish, which is why we set about formulating our wax rich car shampoo, Bubblicious. Containing advanced wetting agents, pH neutral surfactants and natural carnauba waxes it's a car shampoo for every detailer's bag.

Bubblicious Car Shampoo is everything you expect from a premium car shampoo. It's bubbly and slick which aids the preservation of any existing LSP/wax coating whilst depositing a new layer of wax onto the surface to help keep your vehicle's paintwork protected.

The bubblegum fragrance of Bubblicious Car Shampoo becomes apparent when its phenomenal foaming action and slick application get to work at safely removing soiling and road grime from the surface. The built-in cleaners minimise the risk of marring with their highly complex surfactant build up. Bubblicious is designed to keep soiling suspended from the vehicle's surface which dramatically reduces the risk of this soiling being re-deposited during the wash process.

Bubblicious Car Shampoo is high in natural carnauba wax, which makes it a great shampoo for carrying out your everyday maintenance washes. This, in turn, helps top up the appearance and adds protection to your existing sealant or wax surface without the risk of harming the surface itself. Not only does Bubblicious offer brilliant cleaning power it also contains added wax properties. Bubblicious Car Shampoo with wax can be diluted up to 250:1 meaning you only need a few caps full per bucket to achieve a perfect, safe wash every time.

HOW TO USE:

Use a suitable pre-wash method to remove loose soiling, we suggest Auto Glanz Piste Snow Foam plus Bug Off Bug & Grime Remover.

1. Fill a wash bucket with clean warm water.
2. Apply 30-50ml of Bubblicious directly to a clean detailer's sponge or wash mitt and agitate gently in the bucket.
3. Gently wash the vehicle from top to bottom ensuring you rinse the wash mitt regularly adopting the two bucket method.
4. Rinse thoroughly with cold water via low-pressure wash or hose.

SAFETY INFORMATION

| | | |
|--------------------|--|---|
| H319 | Causes serious eye irritation. |  |
| P102 | Keep out of reach of children. | |
